Dover NH 03821-1525

Dear Mr. Franklin and Ms. Lincoln:

After talking to Chris Franklin, I collected and copied the enclosed documents as responsive to Ms. Lincoln's request for information presented to U.S. EPA Region 5 in February, as clarified by Mr. Franklin when we talked recently. I am enclosing documents related to the involvement of Molded Fiberglass as a PRP at the Chemical Recovery Systems Site in Elyria, Ohio. These documents, which I indicated to Mr. Franklin I would be able to provide, include: 1) copies of all documents in U.S. EPA's possession which provide evidence Molded Fiberglass sent hazardous substances to the Site; 2) copies of narrative reports, as you requested, which document previous investigations of environmental conditions and contamination at the Site.

I do not believe that Molded Fiberglass, by its 104(e) response, provided any additional evidence regarding its transactions with the Site.

Sincerely,

Thomas C. Nash
Associate Regional Counsel
